

On Friday, December 10, 2010, SIFCO Applied Surface Concepts' parent, SIFCO Industries, Inc., announced the acquisition of T&W Forge from Durrel Company. This acquisition is consistent with SIFCO's overall business growth strategy of focusing upon strengthening relationships with existing customers as well as expansion into new markets and customers.

T&W Forge is located in Alliance, Ohio. The acquisition provides further desired diversification of SIFCO's forging business into the Power Generation market. Aerospace forgings will remain as the predominant market for all of SIFCO Industries forging operations.

SIFCO Applied Surface Concepts currently provides selective electroplating products and contract services to a wide variety of industries and applications operating in the Aerospace, Oil & Gas, Power Generation, Marine and Military markets. We believe this acquisition by our parent organization further aligns our divisional and corporate growth objectives of expanding our presence and service in key markets.

With our experienced technical staff and R&D capabilities we stand ready to assist you with your electroplating needs to enhance your surface properties. Our Mission is to "help our customers save money ... and, make their products better".
