

OIL & GAS INDUSTRY

The SIFCO Process® provides selective application of engineered deposits and allows accurately controlled deposit thicknesses that can minimize or eliminate post machining operations, on both large and small components.

The SIFCO Process is portable.

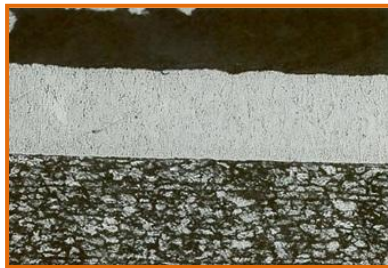

It can be used virtually anywhere! Use it on-site, in your facilities, or at any of our facilities worldwide.

The SIFCO Process is flexible.

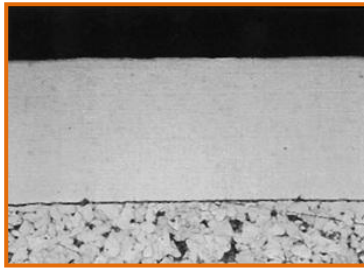

Our process does not require extensive masking and can eliminate the need for component disassembly.

SIFCO Engineered Deposits for

- ✓ Conductivity
- ✓ Wear resistance
- ✓ Surface hardness
- ✓ Anti-galling
- ✓ Corrosion resistance
- ✓ Refurbishment
- ✓ Carburizing stop-off
- ✓ Pre-braze

AeroNikl® 250
Soft Sulfamate Nickel

AeroNikl® 575
Hard Sulfamate Nickel

Nickel-Tungsten
