

Lunch and Learn

ON-SITE PRESENTATIONS

SIFCO ASC is the global leader in selective plating technology with a mission to create global awareness of the SIFCO Process®. SIFCO ASC's technical staff is available for on-site lunch and learn events, so take advantage of the opportunity to teach your technical and engineering team the benefits of the SIFCO Process®. Lunch and learn events are held at your location and topics are customized to focus on your specific components and industry. Discussions include the capabilities of selective plating in applications pertaining to:

- ▶ Corrosion Protection
- ▶ Wear Resistance
- ▶ Lubricity
- ▶ Conductivity
- ▶ Hardness
- ▶ Enhanced sealing capability
- ▶ Refurbishment to original dimensions specifications

The presentation will include technical information about the process and specific examples relating to your company applications and components. The presentation will be followed with a Question and Answer segment. The 90 to 120 minute presentation will also include lunch and brochures.

WHO SHOULD ATTEND

SIFCO Process® training and lunch and learn events are beneficial for operators, engineers, machinists, mechanics, welders and supervisory staff. All attendees will learn the technical aspects of the SIFCO Process® and will leave with the knowledge of a better method to enhance or repair components.

SIFCO ASC ADVANTAGES

- ▶ Custom, engineered solutions for OEM and repair applications
- ▶ Increase service life of components and equipment
- ▶ Minimal masking and disassembly
- ▶ Faster than other plating methods
- ▶ Portable process for on-site application
- ▶ Superior technical expertise
- ▶ Quality plating results
