SIFCO Applied Surface Concepts is the global leader in the selective plating industry. More MRO and OEM facilities depend on SIFCO ASC than any other plating specialist for job shop selective plating services. When timing is critical and you want it done right the first time, contact SIFCO ASC at one of our seven locations worldwide.

**THE SIFCO PROCESS®**
The SIFCO Process® is a portable method to plate localized areas without the use of an immersion tank.

**PORTABILITY**
It can be used virtually anywhere! Use the SIFCO Process® on-site, in your facilities, or at any of our locations worldwide.

**FLEXIBILITY**
Our process does not require extensive masking and can minimize or eliminate the need for component disassembly.

**SIFCO ASC ENGINEERED DEPOSITS:**
Anti-galling • Surface Hardness • Wear Resistance • Corrosion Resistance • Refurbishments

**TYPICAL APPLICATIONS**
- Drill Bits
- Tubing Hanger Bodies
- Inner Mandrels
- Small Port Repairs
- Outer Cylinders
- Casing Hangers
- Riser Spanner Joints
- Tension Joints
- Tubular Connections / Threads
- Copper Select® Premium Threaded Connections
